

# Top Countries for Steelmaking Coal Consumption

Steelmaking coal is a key ingredient in the production of steel, which is critical to many of the things people rely on every day around the world: our buildings, vehicles, rapid transit and many daily household items.

## Global steelmaking coal consumption

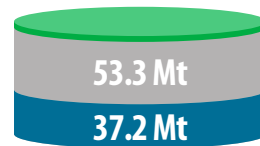

Canada  
3.1 Mt

**China**  
575 Mt

- Imported from Canada
- Imported from other countries
- Domestic consumption

Canada  
4.3 Mt

**India**  
94.8 Mt

Canada  
5.9 Mt

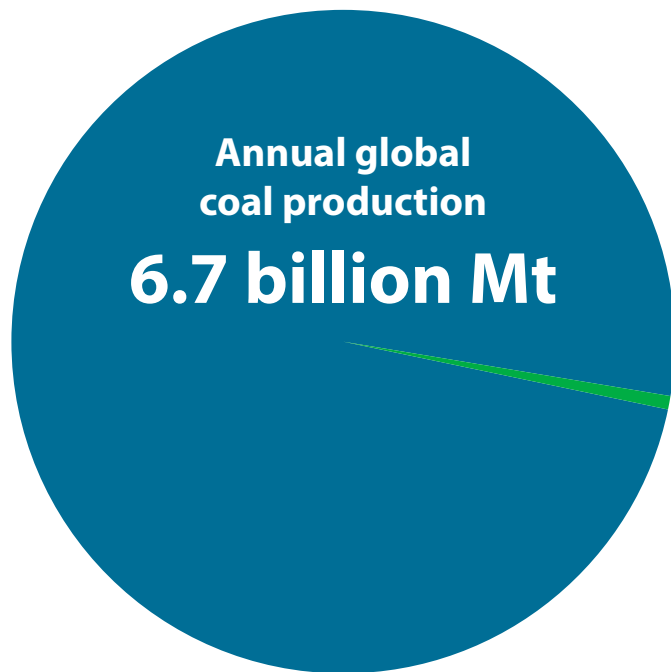

**Japan**  
43 Mt

Canada  
6.6 Mt

**Korea**  
22.6 Mt

## Canada's Role in the Global Marketplace

Canada is one of about 24 countries that produce coal for over 41 countries who use coal for steelmaking or electricity. While Canada's share of global coal production is small, our high-quality Canadian coal is in high demand around the world.

Canada  
**59.5 million Mt**  
**<1%**  
of global production
